SUMMARY

A highly motivated and resourceful Front-End Developer with 4.5+ years of hands-on experience in designing and developing responsive, user-friendly websites. With a strong ability to leverage AI-driven tools like Copilot, ChatGPT, and other advanced solutions, I excel at streamlining workflows, solving complex development and design challenges, and delivering high-quality results while saving time and boosting efficiency.

Passionate about collaborating with senior developers, I actively seek mentorship and continually enhance my skills to stay at the forefront of industry trends. Dedicated to creating intuitive user interfaces and optimizing user experiences, I am proficient in modern web technologies and best practices that drive success. With a commitment to contributing to both organizational growth and my own professional development, I am eager to tackle new challenges in a dynamic team. My goal is to continue expanding my expertise while making impactful contributions to innovative and cutting-edge projects.

EXPERIENCE

UX/UI Developer

02/2022 - Present

Formidium India Private Limited ↗

- Managed and maintained 10+ high-traffic websites, ensuring optimal performance, functionality, and visual appeal.
