PROFESSIONAL SUMMARY

Frontend Developer with over 6 years of professional experience building responsive, scalable and user-focused web applications, with deep hands-on expertise in React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux Toolkit, React Router, REST APIs and modern UI development. Experienced in reusable component architecture, performance optimization, responsive design, cross-browser compatibility, API integration, debugging and enterprise workflows. Proficient in leveraging AI-powered tools such as GitHub Copilot, Claude, Cursor and ChatGPT to accelerate development and improve code quality. Understanding of modern Front-end / Backend / Database ecosystems, principles and performance optimization. Proven track record of managing multiple high-traffic sites and delivering enterprise modules for healthcare and retail platforms.

WORK EXPERIENCE

Lead Developer | Growit.ai Technology Private Limited, Jaipur

08/2025 - 08/2026

- Led frontend development for an **AI-powered, multi-tenant Hospital Information Management System (HIMS)**, owning React-based UI architecture and delivery across complex, role-based healthcare workflows.
- Architected and developed **scalable, reusable React.js components and modules** using **React 19, TypeScript, JavaScript (ES6+), React Hooks, Redux Toolkit, React Router and Tailwind CSS**, following modern component and frontend architecture patterns.
- Built responsive, accessible and reusable enterprise interfaces for **Patient Management, OPD/IPD, Emergency, Laboratory, Radiology, Pharmacy, Billing, Inventory, Analytics and Reporting**, supporting multiple user roles and workflows.
- Integrated **hundreds of REST API endpoints** using **Axios, JSON and asynchronous programming**, implementing frontend data flows for JWT authentication, RBAC, validation, error handling and complex API-driven workflows with Django REST services.
- Designed and maintained **client-side state and data management** using **Redux Toolkit, Redux, React Redux, Context API and modern data-fetching patterns**, ensuring predictable state architecture across large-scale applications.
- Developed complex **forms, validation flows, dashboards, tables, reusable UI patterns and role-based interfaces**, with a strong focus on responsive design, usability and maintainability.
- Implemented **AI-assisted frontend experiences** including OCR-driven document workflows, intelligent user flows, analytics dashboards and voice-enabled interfaces, integrating AI capabilities into practical enterprise workflows.
- Improved application performance and maintainability through **code splitting, lazy loading, component reuse, caching, API optimization, efficient rendering and browser-level debugging/profiling**.
- Developed and maintained UI systems using **Tailwind CSS, Material UI, Bootstrap, Sass/LESS and reusable component-library patterns**, translating product and design requirements into production-ready interfaces.
- Collaborated closely with **product managers, designers, QA engineers and backend developers** to build, test, debug and release frontend features through Agile/Scrum workflows, Git-based development and code reviews.
- Key project contributions include: - 1. Zonov Hospital Management System: Developed enterprise modules, integrated AI features, and optimized performance for a multi-tenant application. 2. RetailX ERP: Drove the creation of POS Billing, Inventory Management, and Reporting modules, focusing on responsive and scalable architecture. 3. Charge My EV: Developed features for an EV charging platform utilizing React Native, enhancing mobile interfaces and real-time communication capabilities.

UI Developer | Formidium India Private Limited, Jaipur

02/2022 - 07/2025

- Developed and maintained **production-grade React.js applications** using scalable, reusable and performance-oriented component architecture for enterprise and customer-facing products.
- Built **responsive, pixel-perfect and accessible user interfaces** by translating Figma designs into production-ready applications using **React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI and Bootstrap**.
- Designed and maintained **reusable UI components, custom hooks and modular frontend architecture**, improving development consistency, maintainability and feature scalability across multiple applications.
- Implemented complex **client-side state management and application workflows** using **Redux, Redux Toolkit and Context API**, with structured state architecture for large-scale frontend applications.
- Integrated **custom and third-party REST APIs** using **Axios, JSON and asynchronous JavaScript**, building dynamic, data-driven interfaces and collaborating with backend teams on API contracts, payload structures and response performance.

- Managed and optimized **12+ high-traffic production websites and applications**, improving frontend performance, scalability, reliability and overall user experience across different products.
- Enhanced application performance using **code splitting, lazy loading, caching, API optimization and efficient component rendering**, while leveraging **Chrome DevTools** for debugging, profiling and performance analysis.
- Developed interactive **dashboards, analytics interfaces, product pages and customer-facing applications** using **Chart.js, Recharts and reusable visualization components** to present KPIs, trends, financial data, operational metrics and business insights.
- Built responsive interfaces with strong attention to **cross-browser compatibility, mobile responsiveness, usability and UI consistency** across different screen sizes and devices.
- Proposed and implemented **UI/UX improvements** based on modern frontend and design-system principles, improving visual consistency, usability, customer experience and conversion-focused product flows.
- Worked extensively with **HubSpot CRM and marketing/product interfaces**, developing and maintaining reusable frontend patterns, landing pages and customer-facing experiences.
- Collaborated with backend engineers on **API performance, database/query optimization and response-time improvements**, contributing frontend insights to improve overall application efficiency.
- Contributed to **frontend testing, debugging and issue resolution**, working with development and QA teams to identify and resolve browser, UI, API and application-level issues.
- Participated in **Git-based development, pull requests, code reviews, deployment workflows and continuous application improvements** within Agile/Scrum teams.
- Worked closely with **UI/UX designers, backend developers, QA engineers and product managers** to translate business requirements and design specifications into scalable, production-ready frontend features.
- Maintained **clean, reusable, maintainable and well-documented code**, following frontend best practices, coding standards and component-driven development principles.
- Leveraged **AI-assisted development tools** to improve coding productivity, debugging efficiency, documentation and overall feature delivery speed.

Web Developer | i3Techs, Jaipur

11/2020 - 02/2022

- Developed and maintained **50+ responsive, production websites and web applications**, focusing on frontend performance, usability, accessibility, SEO, reliability and cross-browser compatibility.
- Converted **PSD and Figma designs into pixel-accurate, responsive production interfaces** using **HTML5, CSS3, JavaScript, Bootstrap and React**, following mobile-first and component-based frontend practices.
- Built reusable **UI components, layout patterns and frontend code structures** to improve consistency, maintainability and development efficiency across multiple projects.
- Designed and implemented modern, user-focused website layouts and visual interfaces using **Adobe Photoshop**, with close attention to typography, spacing, responsive behaviour and visual consistency.
- Customized **WordPress themes and plugins** and developed customer-facing interfaces using **Elementor**, while maintaining SEO-friendly markup, responsive layouts and consistent user experiences.
- Improved website performance through **image optimization, script optimization, caching, asset optimization and frontend code improvements**, contributing to faster page load times and better usability.
- Ensured **cross-browser and cross-device compatibility** across desktop, tablet and mobile screen sizes, resolving UI and browser-specific issues during development and testing.
- Implemented responsive **landing pages, product pages and business websites** from design specifications while maintaining consistency with branding and modern UI/UX principles.
- Applied frontend best practices for **semantic HTML, CSS organization, responsive design, accessibility and reusable code**, producing clean and maintainable implementations.
- Collaborated with designers and clients to translate business and design requirements into production-ready web interfaces and resolve UI/UX issues.
- Worked with **Git/version-control workflows, debugging, deployment support and production maintenance** across multiple client websites and applications.
- Gained practical exposure to **API-driven integrations, server-side workflows and backend collaboration**, primarily from a frontend integration and data-consumption perspective.

Trainee in Web Development | i3Techs, Jaipur05/2019 - 07/2019

- Gained hands-on experience with modern web development tools, design workflows, and methodologies across multiple projects.
- Designed visually engaging web interfaces, graphics, and mockups using Adobe XD, ensuring alignment with branding and project goals.
- Contributed to UI/UX design initiatives, emphasizing usability, visual consistency, and modern design principles to enhance user engagement.

SELECTED PROJECT HIGHLIGHTS

- **Hospital Information Management System:** React + JavaScript enterprise frontend with multi-tenant workflows, Redux Toolkit, Tailwind CSS, REST APIs, JWT/RBAC, reusable modules, dashboards and performance optimization.
- **RetailX ERP:** React-based POS billing, inventory and reporting modules with responsive workflows and data-driven interfaces.
- **Enterprise Web Platforms:** Production websites and applications requiring reusable components, responsive UI, REST integration, browser compatibility, debugging, Git-based delivery and performance tuning.

TECHNICAL SKILLS

Frontend: React.js, React 19, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Hooks, Component Lifecycle, Reusable Components, React Router, Next.js, Responsive Web Design, Accessibility, Cross-Browser Compatibility.

State & Data Management: Redux Toolkit, Redux, React Redux, Context API, Zustand, TanStack Query (React Query), State Architecture, Form State Management & Validation

UI / Styling & Design: Tailwind CSS, Material UI (MUI), Bootstrap, Sass, LESS, Radix UI, Lucide React, React Icons, Figma, Adobe XD, UI/UX Principles, Design Systems, Component Library Patterns, Figma-to-UI Implementation, Accessibility-Focused UI Development

APIs & Integration: REST APIs, REST API Architecture, GraphQL, JSON, Axios, Asynchronous Programming, Third-Party API Integration, API Integration, JWT Authentication, Role-Based Access Control (RBAC), Payment Integrations, Healthcare Technology Integrations, WhatsApp Business API

Build, Tooling & Testing: Vite, Webpack, Babel, ESLint, Chrome DevTools, Browser Debugging, Debugging, Performance Profiling, Vitest, Jest, React Testing Library, Cypress, Playwright, End-to-End (E2E) Testing

Backend / Server-Side: Python 3.11, Django, Django REST Framework, Node.js, Express.js

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Database Fundamentals

Cloud & Infrastructure: AWS, AWS S3, Google Cloud, Vercel, Docker, Docker Compose, Linux, Cloud Deployment Fundamentals, Frontend Deployment, Release Workflows, CI/CD Workflows

Version Control & Engineering: Git, GitHub, GitLab, Code Reviews, Agile, Scrum, Software Debugging, Release Management

AI / Automation & Emerging Technologies: OpenAI GPT Models, Deepgram Speech-to-Text, Whisper, Faster-Whisper, OCR Workflows, AI-Assisted Development Tools (GitHub Copilot, Claude, Cursor, ChatGPT)

Additional Engineering Knowledge: Frontend Architecture, Component Architecture, Design-System Architecture, API Integration Patterns, Authentication & Authorization, Deployment Support

EDUCATION

Bachelor's Degree in Computer Science Engineering | Global Institute of Technology, JaipurAugust 2016 - August 2020

Senior Secondary Education (Science) | Anand Public School, Sawai MadhopurAugust 2016

LANGUAGES

English, Hindi
