

TARUN SINGH GOHIL

Full Stack Developer (MERN) | React.js · Node.js · Express.js · MongoDB | UI/UX

Jaipur, Rajasthan, India | +91 8505015184 | tarungohil80@gmail.com

[linkedin.com/in/tarun-singh-gohil](https://www.linkedin.com/in/tarun-singh-gohil) | github.com/tarunsinghgohil

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building and shipping production web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js) with TypeScript, RESTful APIs and modern UI/UX. Currently Lead Developer on a multi-tenant, AI-powered Hospital Information Management System, owning React.js frontend architecture while building and integrating backend services, authentication and role-based access control. Delivered enterprise modules across healthcare, retail/ERP and EV-charging platforms, and has built or maintained 60+ production websites and applications. Strong in reusable component architecture, REST API integration, database-backed features and frontend performance optimization, with day-to-day use of AI-assisted development tools (GitHub Copilot, Claude, Cursor, ChatGPT).

PROFESSIONAL EXPERIENCE

Lead Developer | Growit.ai Technology Private Limited, Jaipur | Aug 2025 – Aug 2026

Full-stack (MERN) development and frontend ownership for AI-powered enterprise SaaS products.

- Led full-stack development of a scalable, multi-tenant, AI-powered Hospital Information Management System (HIMS/HMS), with primary ownership of the React.js frontend and Node.js/Express.js services, while also contributing to Python/Django-based backend integrations.
- Architected and developed enterprise-grade applications using the MERN stack — MongoDB, Express.js, React.js and Node.js — with React 19, TypeScript, JavaScript (ES6+), React Hooks, React Router, Redux Toolkit and Tailwind CSS, following scalable component and frontend architecture patterns.
- Delivered 9+ complex healthcare modules end to end, including Patient Management, OPD, IPD, Emergency, Laboratory, Radiology, Pharmacy, Billing, Inventory, Analytics, Reporting and NABH Compliance, covering API integration, data flows, business workflows and production-ready UI.
- Designed and developed reusable React component architecture and UI systems, including forms, data tables, dashboards, filters, validation flows and role-based interfaces, using Redux Toolkit, Redux, React Redux, Context API, Tailwind CSS, Material UI and Bootstrap to maintain consistency and accelerate feature development.
- Developed and integrated Node.js/Express.js REST APIs with MongoDB/Mongoose, implementing backend services, API flows, request validation, pagination, error handling, authentication workflows and data operations for large-scale enterprise features.
- Worked extensively with hundreds of REST API endpoints, integrating React applications with Node.js/Express.js and Python/Django REST Framework services using Axios, JSON and asynchronous programming, while collaborating with backend engineers on API contracts, payload structures, response handling and performance optimization.
- Implemented secure authentication and authorization mechanisms using JWT, protected routes and Role-Based Access Control (RBAC), supporting multiple hospital tenants, user roles and complex permission-driven workflows across the application.
- Contributed hands-on to Python-based backend development and integrations using Python, Django and Django REST Framework, including API consumption, business-workflow integration, data handling and integration with the React frontend, while maintaining MERN as the primary application stack.
- Improved application performance and scalability through code splitting, lazy loading, reusable component architecture, memoization, caching strategies, efficient rendering, API optimization and bundle optimization, while using Chrome DevTools, Lighthouse and performance profiling to identify and resolve bottlenecks.
- Collaborated closely with product managers, UI/UX designers, QA engineers and backend developers throughout Agile/Scrum sprints, participating in technical discussions, code reviews, debugging, release activities and production issue resolution.
- Managed Git-based development and deployment workflows, including branching, pull requests, code reviews, release coordination and frontend/backend deployment support across cloud environments.

UI Developer | Formidium India Private Limited, Jaipur | Feb 2022 – Jul 2025

- Developed and maintained production-grade MERN stack applications using React.js, JavaScript (ES6+), TypeScript, Node.js, Express.js and MongoDB, with primary ownership of frontend architecture and UI development across multiple enterprise and customer-facing products.
- Architected scalable, reusable React applications using modular components, custom hooks, Redux, Redux Toolkit and Context API, building maintainable frontend systems for multiple products, dashboards, business workflows and high-traffic web applications.
- Built and integrated Node.js / Express.js backend services and REST APIs with React applications, working with MongoDB for data-driven features, API workflows and application functionality while collaborating with backend teams on API contracts, data structures and performance.
- Developed responsive, pixel-perfect and accessible interfaces by converting Figma designs into production-ready applications using React.js, TypeScript, Tailwind CSS, Material UI, Bootstrap, HTML5 and CSS3, ensuring consistent UI/UX across desktop, tablet and mobile devices.
- Worked across multiple MERN-based projects to develop interactive dashboards, analytics interfaces, product pages and business applications, integrating REST APIs and visualization libraries such as Chart.js and Recharts to present KPIs, financial data, operational metrics and real-time business insights.
- Managed and optimized 12+ high-traffic production websites and applications, improving performance, scalability and reliability through code splitting, lazy loading, caching, API optimization, efficient rendering and build optimization using Webpack.
- Integrated custom and third-party REST APIs using Axios, JSON and asynchronous JavaScript, implementing dynamic data flows, error handling and frontend-backend communication while contributing to API response-time and database/query performance improvements.
- Built and maintained HubSpot CRM/CMS marketing pages, product pages and customer-facing interfaces, while also contributing UI/UX improvements, reusable design patterns and conversion-focused experiences across multiple web properties.
- Collaborated with backend engineers, UI/UX designers, QA engineers and product managers in Agile/Scrum teams, contributing to Git-based development, code reviews, debugging, testing, deployment workflows and continuous improvements across MERN applications.
- Leveraged AI-assisted development tools to improve coding productivity, debugging, documentation and feature delivery while maintaining clean, reusable, well-documented code and frontend engineering best practices.

Web Developer | i3Techs, Jaipur | Nov 2020 – Feb 2022

- Developed and maintained 50+ production websites and web applications, with a strong focus on HTML5, CSS3, JavaScript, Bootstrap and React.js, building responsive, performant and user-friendly interfaces across multiple client projects.
- Converted PSD and Figma designs into pixel-perfect, responsive production interfaces, applying mobile-first development, reusable UI patterns, semantic HTML, modern CSS practices and component-based frontend development.
- Built reusable React.js UI components, layouts and frontend structures for selected web applications, improving consistency, maintainability and development efficiency across projects.
- Developed responsive landing pages, product pages, business websites and customer-facing web interfaces, ensuring accessibility, usability, SEO-friendly markup and consistent experiences across desktop, tablet and mobile devices.
- Worked on API-driven frontend integrations, consuming backend data and collaborating on server-side workflows to connect web interfaces with application functionality and dynamic content.
- Customized WordPress themes and plugins and developed customer-facing websites using Elementor, while implementing responsive layouts, SEO best practices, reusable patterns and client-specific functionality.
- Ensured cross-browser and cross-device compatibility, identifying and resolving UI, rendering, responsiveness and browser-specific issues during development, testing and production maintenance.
- Designed and implemented modern visual interfaces using Adobe Photoshop and Adobe XD, collaborating with designers and clients to translate business requirements, branding guidelines and design specifications into production-ready experiences.

- Applied frontend engineering best practices across projects, including responsive design, accessibility, reusable code, CSS organization, debugging, Git-based version control and deployment support.

Web Development Trainee | i3Techs, Jaipur | May 2019 – Jul 2019

- Gained practical exposure to web development, UI/UX design workflows, responsive web design and modern frontend development practices across multiple client projects.
- Designed web interfaces, graphics and mockups using Adobe XD and Photoshop, focusing on visual consistency, typography, spacing, usability and alignment with project requirements.
- Contributed to UI/UX design and frontend implementation activities, developing an understanding of responsive layouts, design systems, usability principles and production-oriented web workflows.

KEY PROJECTS

1. Zonov — Multi-Tenant Hospital Management System (HIMS/HMS)

React.js, React 19, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Django REST Framework, REST APIs, JWT, RBAC, AI/OCR

2. RetailX ERP — POS Billing, Inventory & Reporting

React.js, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs

3. Charge My EV — EV Charging Platform

React Native, React.js, Node.js, Express.js, MongoDB, REST APIs

TECHNICAL SKILLS

Frontend: React.js, React 19, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Hooks, Component Lifecycle, Reusable Components, React Router, Next.js, Responsive Web Design, Responsive Design, Accessibility, Cross-Browser Compatibility

State & Data Management: Redux, Redux Toolkit, React Redux, Context API, Zustand, TanStack Query (React Query), State Architecture, Form State Management & Validation

UI / Styling & Design: Tailwind CSS, Material UI (MUI), Bootstrap, Sass, LESS, jQuery, Radix UI, Lucide React, React Icons, Figma, Adobe XD, UI/UX Principles, Design Systems, Component Library Patterns, Figma-to-UI Implementation, Figma/PSD to Pixel-Perfect UI Development, Accessibility-Focused UI Development, Wireframing

APIs & Integration: REST APIs, RESTful APIs, REST API Architecture, GraphQL, JSON, Axios, Asynchronous Programming, Third-Party API Integration, API Integration, JWT Authentication, Role-Based Access Control (RBAC), Payment Integrations, Healthcare Technology Integrations, WhatsApp Business API

Build, Tooling & Testing: Vite, Webpack, Babel, npm, Yarn, ESLint, Chrome DevTools, Browser Debugging, Debugging, Performance Profiling, Vitest, Jest, React Testing Library, Cypress, Playwright, End-to-End (E2E) Testing

Backend / Server-Side: Node.js, Express.js, Python, Python 3.11, Django, Django REST Framework

Databases & Caching: MongoDB, Mongoose, MySQL, PostgreSQL, Redis, Database Fundamentals, Caching Strategies

Cloud & Infrastructure: AWS, AWS S3, Google Cloud, Vercel, Docker, Docker Compose, Linux, Cloud Deployment Fundamentals, Frontend Deployment, Deployment Workflows, Release Workflows, CI/CD Workflows

Performance & SEO: Code Splitting, Lazy Loading, Bundle Optimization, Core Web Vitals, Lighthouse, Performance Profiling, On-Page Search Engine Optimization (SEO)

CMS & Platforms: WordPress, WordPress Theme and Plugin Customization, Elementor, HubSpot CRM, HubSpot CMS

Version Control & Engineering: Git, GitHub, GitLab, Git-Based Version Control, Code Reviews, Agile, Scrum, Software Debugging, Release Management, Deployment Support, Frontend Architecture, Component Architecture, Design-System Architecture, API Integration Patterns, Authentication & Authorization

AI / Automation & Emerging Technologies: OpenAI GPT Models, Deepgram Speech-to-Text, Whisper, Faster-Whisper, OCR Workflows, AI-Assisted Development Tools (GitHub Copilot, Claude, Cursor, ChatGPT)

EDUCATION

Bachelor's Degree in CSE | Global Institute of Technology, Jaipur

August 2016 - August 2020

Senior Secondary Education (Science) | Anand Public School, Sawai Madhopur

August 2016

LANGUAGES

English, Hindi
