

TARUN SINGH GOHIL

UI/UX | FRONTEND | BACKEND | MERN DEVELOPER

+91-8505015184 | tarungohil80@gmail.com | Jaipur, Rajasthan, India | www.linkedin.com/in/tarun-singh-gohil/

CAREER SUMMARY

Highly motivated and resourceful developer with ~ 6 years of experience in building responsive, scalable, and user-friendly web applications. Experienced in building scalable, responsive, and high-performance web applications with modern UI/UX principles. Proficient in leveraging AI-powered tools such as GitHub Copilot, Claude, Cursor and ChatGPT to accelerate development and improve code quality. Strong understanding of frontend architecture, backend integration, RESTful APIs, database design, and performance optimization. Understanding of modern Front-end / Backend / Database ecosystems, principles and performance optimization. Proven track record of managing multiple high-traffic sites and delivering enterprise modules for healthcare and retail platforms.

WORK EXPERIENCE

Lead Developer | Growit.ai Technology Private Limited

08/2025 – Ongoing

- Spearheaded frontend development for an AI-powered, multi-tenant Hospital Information Management System (HMS), significantly enhancing healthcare operations and workflows.
- Architected and implemented scalable React.js components and UI modules using modern technologies such as TypeScript, Redux Toolkit, and Tailwind CSS.
- Delivered comprehensive modules, including Patient Management, OPD, IPD, Laboratory, Radiology, Pharmacy, Billing, Inventory, and NABH compliance, ensuring a streamlined patient experience.
- Integrated secure JWT authentication, role-based access control (RBAC), and complex healthcare workflows with the Django REST backend services to enhance security and user management.
- Collaborated effectively with backend engineers to connect hundreds of REST API endpoints, improving application performance, maintainability, and scalability.
- Developed AI-powered features, including OCR-based document processing, intelligent workflows, and analytics dashboards, significantly enhancing operational efficiency.
- Enhanced frontend performance through advanced techniques such as code splitting, lazy loading, caching strategies, and reusable architecture, optimizing user experience.
- Engaged with product managers, designers, QA engineers, and cross-functional teams to deliver high-quality enterprise solutions, adhering to Agile methodologies and best practices.
- Contributed to deployment workflows, version control management, and rapid issue resolution, ensuring continuous platform improvements and feature enhancements.
- Key project contributions include: - **1. Zonov Hospital Management System:** Developed enterprise modules, integrated AI features, and optimized performance for a multi-tenant application. **2. RetailX ERP:** Drove the creation of POS Billing, Inventory Management, and Reporting modules, focusing on responsive and scalable architecture. **3. Charge My EV:** Developed features for an EV charging platform utilizing React Native, enhancing mobile interfaces and real-time communication capabilities.

- Developed and maintained scalable React.js applications utilizing reusable, modular, and high-performance component architecture.
- Built responsive, pixel-perfect user interfaces by transforming Figma designs into production-ready applications with Tailwind CSS, Material UI, Bootstrap, HTML5, and CSS3.
- Designed reusable UI components and implemented efficient state management utilizing Redux and Context API for enhanced frontend architecture.
- Integrated custom and third-party REST APIs to create dynamic, real-time, and data-driven web applications.
- Managed and optimized 12+ high-traffic production websites and applications, improving performance, scalability, and reliability.
- Enhanced application performance through strategies like code splitting, lazy loading, API optimization, and caching techniques.
- Collaborated with backend teams to improve database query performance and optimize API response times for overall application efficiency.
- Developed user-centric product pages and dashboards, significantly boosting user engagement, usability, and conversion rates.
- Ensured responsive design and cross-browser compatibility for a seamless user experience across all devices.
- Proposed and implemented UI/UX improvements in line with modern design trends, enhancing visual consistency and customer experience.
- Worked extensively with HubSpot CRM to create and maintain marketing pages and customer-facing interfaces.
- Leveraged AI-powered development tools to enhance coding efficiency and accelerate feature delivery.
- Collaborated with UI/UX designers, backend developers, QA engineers, and product managers in an Agile and Scrum environment to deliver comprehensive features.
- Participated in Git-based version control, code reviews, debugging, deployment, and continuous application enhancements.
- Delivered clean, maintainable, and well-documented code adhering to frontend best practices and coding standards.

- Developed and maintained 50+ responsive WordPress websites focusing on performance, accessibility, and user experience.
- Converted PSD and Figma designs into pixel-perfect, SEO-friendly HTML/CSS layouts using HTML5, CSS3, JavaScript and Bootstrap.
- Customized WordPress themes and plugins to meet client requirements and implemented mobile-first UIs with Elementor.
- Ensured cross-browser and cross-device compatibility and improved site speed through image and code optimization and caching.
- Created reusable frontend components and code libraries to streamline development and maintainability.

- Gained hands-on experience with **modern web development tools, design workflows, and methodologies** across multiple projects.
- Designed **visually engaging web interfaces, graphics, and mockups** using **Adobe XD**, ensuring alignment with branding and project goals.
- Contributed to **UI/UX design initiatives**, emphasizing **usability, visual consistency, and modern design principles** to enhance user engagement.

EDUCATION AND CERTIFICATION

Bachelor's degree (CSE) | Global Institute of Technology, Jaipur

August 2016 - August 2020

Senior Secondary Education (Science) | Anand Public School, Jaipur

August 2016

SKILLS

HTML5, CSS3, JavaScript (ES6+), Bootstrap, React.js, Redux, Tailwind CSS, Bootstrap, jQuery, Typescript, Figma, Adobe XD, Python, Django, Express, UI/UX, Node.js, AWS, Google Cloud, Express.js, RESTful APIs, Git, GitHub, Chrome DevTools, Webpack, Babel, MongoDB, Docker, MySQL, Agile & Scrum Methodologies, Responsive Design, Cross-Browser Compatibility, AI-powered development tools (Claude, Cursor, GitHub Copilot, ChatGPT)

LANGUAGE

English, Hindi
