

TARUN SINGH GOHIL

PRODUCT MANAGER | TECHNICAL PRODUCT MANAGER | PRODUCT & UI/UX | B2B/B2C

Jaipur, Rajasthan, India | +91 8505015184 | tarungohil80@gmail.com | linkedin.com/in/tarun-singh-gohil | github.com/tarunsinghgothil

PROFESSIONAL SUMMARY

Product-focused technology professional with 6+ years of experience working across B2B and B2C digital products, translating business requirements into product features, workflows, dashboards and production-ready experiences. Experienced in product discovery, product design, roadmap planning, KPI definition, Jira-based delivery, PRD and requirement documentation, stakeholder coordination, analytics dashboards, API integrations and cross-functional delivery with engineering, UI/UX and QA teams. Strong technical foundation across React.js, TypeScript, Node.js, Express.js, Python/Django, REST APIs, MongoDB, MySQL and modern cloud/deployment ecosystems, enabling effective collaboration with engineering teams and practical technical decision-making. Hands-on experience in healthcare, ERP, e-commerce, EV charging, CRM/CMS and customer-facing web products, with an analytical, data-driven approach to user workflows, product adoption, operational metrics and continuous improvement.

PRODUCT MANAGEMENT CAPABILITIES

Product Strategy & Vision: Product vision, roadmap planning, feature prioritization, requirement discovery, workflow definition, product lifecycle thinking, business-to-technology translation, release planning.

Product Discovery & Requirements: PRD writing, user stories, acceptance criteria, feature breakdown, functional requirements, process mapping, user-flow definition, edge-case identification, requirement clarification.

Delivery & Execution: Jira, sprint planning, task management, backlog coordination, cross-functional delivery, dependency tracking, release coordination, QA/UAT collaboration, production issue resolution.

Data & Analytics: KPI definition, North Star Metric thinking, analytics dashboards, operational metrics, financial KPIs, product usage insights, trend analysis, reporting, data-driven prioritization.

UX & Product Design: Product design, wireframing, Figma, responsive UX, design-system thinking, usability improvements, role-based workflows, accessibility, information architecture, design-to-development handoff.

Stakeholder Management: Product, engineering, UI/UX, QA, business and customer collaboration; requirement alignment; trade-off discussions; delivery communication; feedback incorporation.

Technical Product Knowledge: REST APIs, API contracts, third-party integrations, authentication/RBAC, payments, database-backed workflows, microservice/API concepts, frontend architecture, backend services and deployment fundamentals.

PROFESSIONAL EXPERIENCE

Lead Developer | Growit.ai Technology Private Limited, Jaipur | Aug 2025 - Aug 2026

- Owned product-focused delivery for AI-powered enterprise SaaS products, working across product vision, roadmap discussions, feature planning, business workflows and technical execution for complex multi-tenant applications.
- Worked with stakeholders to understand business objectives, convert requirements into product features, define user workflows, break large initiatives into actionable Jira tasks and coordinate delivery with engineering and QA.
- Managed Jira-based work across discovery, development, testing and release stages, maintaining visibility into feature status, dependencies, blockers, priorities and delivery milestones.
- Created and refined product requirements and PRD-style documentation covering problem statements, functional requirements, user flows, acceptance criteria, edge cases, API dependencies and expected product outcomes.
- Defined and tracked KPIs for product areas including operational activity, financial workflows, patient activity, service utilization, reporting and dashboard performance; used data and product usage patterns to guide improvements.
- Designed and delivered analytics and reporting dashboards for hospital operations, financial activity, patient workflows, laboratory/radiology operations, pharmacy/inventory and management reporting.
- Led product design discussions with UI/UX stakeholders and converted business needs into Figma-ready flows, information architecture, reusable UI patterns, forms, tables, filters, dashboards and role-based experiences.
- Collaborated closely with engineering teams on API contracts, integrations, payload structures, data models, authentication, RBAC, performance considerations and technical feasibility before and during implementation.
- Worked on a multi-tenant Hospital Information Management System covering Patient Management, OPD, IPD, Emergency, Laboratory, Radiology, Pharmacy, Billing, Inventory, Analytics, Reporting and NABH-oriented workflows.
- Integrated hundreds of REST API endpoints and supported third-party/enterprise integrations using Axios, JSON, authentication workflows and asynchronous data flows, helping align product requirements with technical implementation.
- Used product and operational data to identify workflow friction, improve usability, prioritize enhancements and resolve production issues across multiple user roles and hospital tenants.
- Partnered with product managers, business stakeholders, designers, backend developers and QA engineers through Agile/Scrum ceremonies, reviews, UAT, release coordination and post-release issue resolution.
- Contributed to B2B enterprise product initiatives and B2C/customer-facing experiences, balancing user needs, business priorities, implementation effort and delivery timelines.

- Supported release planning, feature validation, documentation and production-readiness activities while maintaining a strong understanding of the underlying React, Node.js, Python/Django, API and database stack.

Key Product Area: Zonov AI Hospital Management System

- Product scope: multi-tenant healthcare platform with 34+ enterprise modules, role-based workflows, analytics/reporting, billing, inventory, patient journeys, compliance workflows and AI-enabled capabilities.
- Product responsibilities included roadmap input, requirement analysis, workflow design, KPI/dashboard definition, Jira task management, engineering coordination, UX refinement, API/integration planning and production delivery.

UI Developer / Product Delivery Contributor | Formidium India Private Limited, Jaipur | Feb 2022 - Jul 2025

- Worked for more than three years across enterprise and customer-facing B2B/B2C products, combining product requirements, UI/UX, analytics, frontend engineering and delivery coordination.
- Used Jira extensively for task planning, sprint execution, issue tracking, backlog follow-up, delivery coordination and status visibility across multiple product initiatives and engineering workflows.
- Participated in product planning and requirement discussions, translating business requirements into functional screens, workflows, acceptance expectations, development tasks and release-ready features.
- Contributed to product roadmap discussions by identifying dependencies, sequencing feature work, estimating implementation complexity from the frontend perspective and aligning delivery with business priorities.
- Created product and technical requirement documentation, including feature behavior, screen requirements, API dependencies, validation rules, user states, error scenarios and UI acceptance criteria.
- Worked closely with product managers, business stakeholders, UI/UX designers, backend engineers and QA teams to resolve ambiguity, validate requirements and deliver production-ready product features.
- Designed and implemented analytics dashboards using Chart.js/Recharts and reusable visualization components to present KPIs, financial metrics, operational trends and business insights.
- Contributed to data-driven product decisions by examining dashboard patterns, API responses, workflow usage and performance indicators and converting observations into UI/UX and feature improvements.
- Designed product interfaces and user flows from Figma, including information architecture, navigation, forms, tables, filters, dashboards, reporting views and responsive customer-facing experiences.
- Worked on API-driven products using REST APIs, Axios, JSON, asynchronous programming and third-party integrations, collaborating with backend teams on API contracts, payload structures, errors and response performance.
- Supported B2B business applications and B2C/customer-facing product experiences, balancing usability, performance, responsive design, conversion-oriented journeys and business rules.
- Managed and optimized 12+ high-traffic production websites/applications while contributing to reliability, performance, analytics, UX consistency, release quality and continuous product improvements.
- Participated in Agile/Scrum ceremonies, sprint planning, backlog discussions, code/design reviews, QA/UAT coordination, release preparation and production support.
- Worked with HubSpot CRM/CMS and marketing/product interfaces, using customer-facing data and business requirements to improve content, navigation, forms, landing pages and conversion-focused experiences.
- Collaborated on product prioritization and issue resolution by evaluating business impact, user impact, dependencies, technical effort and release constraints with cross-functional teams.

EARLIER PRODUCT & WEB EXPERIENCE

Web Developer | i3Techs, Jaipur | Nov 2020 - Feb 2022

- Worked on 50+ client-facing websites and web applications spanning B2B and B2C use cases, helping translate business needs into product pages, dashboards, workflows and responsive digital experiences.
- Handled requirement discussions, UI/UX planning, product-page structure, customer journeys and implementation of business-driven website functionality.
- Built and maintained data-driven dashboards and reporting-style interfaces, consuming APIs and presenting business information through structured views, metrics and reusable frontend patterns.
- Integrated backend APIs and dynamic data sources, working with server-side teams to consume data, troubleshoot issues and validate end-to-end functionality.
- Designed product and user experiences from PSD/Figma specifications, contributing wireframes, interface structure, responsive behavior, usability improvements and reusable UI patterns.
- Worked with clients and internal stakeholders to clarify scope, incorporate feedback, resolve UX issues and deliver production-ready web experiences.
- Supported SEO, performance, accessibility, responsive behavior and cross-browser quality across multiple product and customer-facing properties.
- Worked with WordPress, Elementor and CMS workflows while also developing React-based interfaces for selected applications.

Web Development Trainee | i3Techs, Jaipur | May 2019 - Jul 2019

- Gained hands-on exposure to web product development, UI/UX workflows, responsive design, design reviews and production-oriented delivery practices.
- Created visual mockups and interface concepts using Adobe XD and Photoshop and supported implementation aligned with product and client requirements.

SELECTED PRODUCT PORTFOLIO

Zonov AI Hospital Management System - React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Django REST, REST APIs, JWT, RBAC, AI/OCR. Product focus: multi-tenant enterprise healthcare workflows, analytics, reporting, patient journeys, billing, inventory, compliance and AI-enabled capabilities.

RetailX ERP - React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB and REST APIs. Product focus: POS billing, inventory management, reporting, operational workflows and data-driven business dashboards.

E-commerce - React/Vite/Tailwind product experience covering catalog, product discovery, cart/checkout-style flows, API-driven data consumption and responsive B2C e-commerce UI patterns.

Charge My EV - React Native, React.js, Node.js, Express.js and MongoDB. Product focus: EV charging workflows, mobile UX, real-time communication and API-driven experiences.

TECHNICAL PRODUCT & ANALYTICS STACK

Product Management: Product Vision, Roadmap Planning, Feature Prioritization, PRDs, User Stories, Acceptance Criteria, Requirement Analysis, User Flows, Jira, Sprint Planning, Backlog Management, Release Planning, Stakeholder Management, Agile, Scrum, UAT.

Analytics & Metrics: KPI Definition, North Star Metric Frameworks, Product Analytics, Data/Analytics Dashboards, Operational Metrics, Financial Metrics, Reporting, Trend Analysis, Dashboard UX, Chart.js, Recharts.

Design & UX: Product Design, Figma, Adobe XD, Wireframing, Information Architecture, User Journeys, Responsive UX, Accessibility, Design Systems, Component Libraries, Figma-to-UI Delivery.

Engineering & Integrations: React.js, React 19, JavaScript, TypeScript, Node.js, Express.js, Python, Django, Django REST Framework, REST APIs, GraphQL, Axios, JSON, API Contracts, Third-Party Integrations, JWT, RBAC, Payment Integrations, WhatsApp Business API.

Data & Platforms: MongoDB, Mongoose, MySQL, PostgreSQL, Redis, AWS, AWS S3, Google Cloud, Vercel, Docker, GitHub, GitLab, CI/CD, Webpack, Vite, Chrome DevTools, Lighthouse.

AI & Productivity: OpenAI GPT Models, Deepgram Speech-to-Text, Whisper, Faster-Whisper, OCR Workflows, GitHub Copilot, Claude, Cursor, ChatGPT.

EDUCATION

Bachelor's Degree in Computer Science Engineering | Global Institute of Technology, Jaipur | Aug 2016 - Aug 2020

Senior Secondary Education (Science) | Anand Public School, Sawai Madhopur | 2016

LANGUAGES

English | Hindi
